

Although every effort has been made to confirm type, run and size of drainage it is advisable to check these details against statutory authority records before proceeding with any design.

Although every effort has been made to confirm species of trees shown on this drawing if it is critical to design we do not accept responsibility for any errors and advise consultation with an arboriculturalist.

Every effort has been made to confirm the structure within the building, however this is a non-intrusive survey and we accept no responsibility for any errors beyond the visible floor. If this is critical to design we suggest further investigation.

As determined by RICS guidelines, this survey has a presentation scale of 1:100. Interpolated dimensions will be within tolerance for this and smaller scales only.

Do Not Scale From Paper Copies
